Experience

Frontend Developer | Helmer — Client: TipTop Restaurant Apr 2025

- Architected a multi-role React.js platform comprising a **customer ordering panel**, **admin management system**, and **delivery tracking dashboard**, enabling end-to-end order lifecycle management.
- Built reusable component library with **React Hooks** and **Redux** for shared state across roles; integrated RESTful APIs for real-time menu updates, order status sync, and delivery assignment.
- Optimized bundle size and lazy-loading strategy, achieving **35% faster load times**; implemented responsive layouts with **Tailwind CSS**, improving mobile engagement by **40%**.
- Applied on-page SEO best practices (semantic HTML5, meta tags, structured data), boosting local search visibility.

Frontend Developer | Helmer — Client: Baliram Laundry Mar 2025

- Developed a multi-role web portal with a **customer booking panel**, **live order tracking interface**, and **admin dashboard** for order and user management using **React.js** and **Firebase**.
- Designed intuitive UI/UX flows in close collaboration with the business owner, reducing friction in the booking journey and cutting support calls by **30%**.
- Built fully responsive layouts and improved local SEO, contributing to a **60% increase in walk-in traffic**.

Projects

Transportation Data Collection & Visualization Platform | SIH 2025 | Link Sep 2025

- Built a **React Native** citizen mobile app for real-time trip data collection and a **React.js** owner dashboard for data approval and fleet management.
- Developed an interactive scientist web panel featuring **geospatial heatmaps** (Leaflet), OD matrix, temporal and demographic charts — enabling visual analysis of large-scale mobility datasets.
- Implemented polygon selection, time-range filtering, and PDF report generation; handled complex UI state with custom hooks and context API.
- Stack: **React.js**, **React Native**, **Node.js**, **MongoDB**, **Leaflet**, **Tailwind CSS**

CodeBuddy – Group Coding Platform | Link Jan 2025

- Built a real-time collaborative coding platform with a **shared code editor**, synchronized group chat, and multi-user session management using **React.js**.
- Integrated AI-powered problem tagging to classify challenges by difficulty and topic; designed analytics dashboards to visualise user performance trends.
- Stack: **React.js**, **Node.js**, **MongoDB**

Technologies

Frontend: JavaScript (ES6+), TypeScript, React.js, Next.js, React Native, HTML5, CSS3, SASS/SCSS, Tailwind CSS, Redux, React Hooks, REST APIs, Webpack, Vite

Backend & Tools: Node.js, Express.js, Firebase, MongoDB, SQL, Git, GitHub, CI/CD

Other: Java, OOP, Performance Optimization, Accessibility (a11y), SEO Optimization, Responsive Design, Component Architecture

Certifications

Security and Privacy in Online Social Media — NPTEL May 2024

Explored security mechanisms, privacy frameworks, and attack detection in social platforms | Link

Approximation Algorithms and Linear Programming — Coursera Apr 2025

Studied LP duality, optimization strategies, and approximation techniques | Link

Achievements

Runner-Up, Smart India Hackathon (SIH) 2025: Delivered a full-stack transport data platform under competition constraints, recognised at the national internal selection round.

Education

Lovely Professional University, B.Tech in Computer Science | CGPA: 7.0 Oct 2022 – Present

Mother's International Academy, Science | 79% Oct 2019 – Jul 2021
